Professional Technician in administrative processes

Cornerstone International Community College, Vancouver, BC

Jan 2020 - Dec -2021

CUN - Bogotá, Colombia

As a Professional Technician in administrative processes, you excel in streamlining operations, data analysis, and optimizing workflow for efficient business management.

SUMMARY

Current student at Cornerstone International Community College of Canada and seeking opportunity to begin a career as a WebDeveloper. With a strong passion for coding and a desire to continuously learn and grow, I am dedicated to becoming a valuable asset to any organization and team. I am adept at quickly filling knowledge gaps and am committed to delivering high-quality work

EXPERIENCE

Phoenix Accounting Services - Remote - Volunteer Feb 2023 - May 2023
web developer

Primary focus was on developing a **robust and user-friendly** application using **React** with **TypeScript**. Over the course of around four months, I played a crucial part in creating a solution that aimed to streamline task management, roles, and labor conflict resolution within the company.

PROJECTS

New Egg. Jul 2023 - Aug 2023
React e-commerce app. Shop securely with PayPal and Stripe. Discover a wide range of dummy data products as we work to perfect the ultimate shopping destination (under development).

Film Folia. Apr 2023 - Jun 2023
React App that seamlessly merges MongoDB, Tailwind CSS, Node.js and Express, creating a space where movie fans around the world can share their thoughts and discussions.

StereoHeart. May 2023 - Jul 2023
Combining the power of React, JavaScript, and Tailwind, we harness the Shazam Core API to craft an immersive audio discovery platform. Elevate your music experience and explore tracks seamlessly, redefining audio exploration, just like Spotify.

League Tracker. Jan 2023 - May 2023
Combining the power of React, JavaScript, and Tailwind, we harness the Shazam Core API to craft an immersive audio discovery platform. Elevate your music experience and explore tracks seamlessly, redefining audio exploration, just like Spotify.
